

# **NEW** QuicKART® M3

## Power-assisted productivity for the Retail workplace

- Increases productivity, reduces payroll
- Reduces risk of employee injury
- Improves employee morale
- Operates in all weather conditions
- Reduces shopping trolley inventory
- Easy-to-use remote control feature

The Dane Technologies QuicKART M3 and M3 HD are the all new, 3rd generation of the best-selling remote control trolley-return system from the original and proven world leader. These powerful, highly maneuverable machines can increase your productivity by 50% or more while reducing the risk of injury to employees and patrons, allowing most stores to recover their investment in as little as five months or less.

**Always a Safe Move**

## Easy to Use

- Unique remote control allows for easy operation
- Ergonomic thumbwheel controller
- Highly maneuverable with forward or reverse operation
- Programmable speeds from 0 to 5.31 km/h
- Long-life batteries allow continuous operation for up to 12 hours on a single charge

## Safe

- Remote control allows an operator to safely steer a line of trolleys from the front, while sending commands to the QuicKART in the back.
- Safety beacon strobe light maximizes visibility
- Patented Automatic Dynamic Braking insures safe operation on slopes
- Parking brake engages when QuicKART stops
- Emergency stop button
- Ergonomic throttle design to minimize operator strain
- Dual-actuation warning horn alerts those nearby
- Battery level indicator monitors battery charge

## Powerful

- 36 Volts; three, 12 volt marine-grade deep cycle batteries
- 36 Volts D.C., 1.25 H.P. continuous duty rating (M3) & 1.5 H.P. continuous-duty rating (M3 HD) 4 Pole drive motor with burst mode and programmable current control
- Proven rugged solid-state electronics are "plug and play"
- On Board 15 Amp @36VDC (45 Amp @12 Volt equivalent) series-balanced Smart Charger with automatic shut off, maintenance charge mode and battery life maximizer

## Certified

- UL Certified to UL standard 583 and CE
- On-board Smart Charger is UL Recognized to UL standard 1564
- The QuicKART remote control is FCC and CE approved

Proudly introducing the new 3rd generation of QuicKART

# QuicKART® M3 & M3 HD

## Efficient

one person can easily retrieve up to 30 trolleys in one trip

## Safe

emergency stop buttons on all controls, warning horn, and flashing beacon

## Easy

controls are intuitive with a cordless remote for easy one-person operation

## The safest, easiest to use, power trolley return system.

The QuicKART M3 and M3 HD are powerful, highly maneuverable, bi-directional, power trolley return machines that can increase your productivity by 50% or more, while reducing the risk of injury and employee turnover.
